Launch vehicles
and more

We can arrange air
transport for many
industries

OIL & GAS

Valves Pumps
Compressors
Wellheads
X-mass trees
Pipes
and more

Dangerous goods
Live animals
and other types of cargo

Case study: Optimisation

CARGO DESCRIPTION: Equipment for ground transportation of heavy-weight and outsize cargo (two self-propelled trailers and a control station)

ROUTE: Maastricht/Amsterdam (Netherlands) – Khabarovsk (Russia)

WEIGHT: 51,000kg (2 pcs x 23,000kg + 2 pcs x 2,500kg)

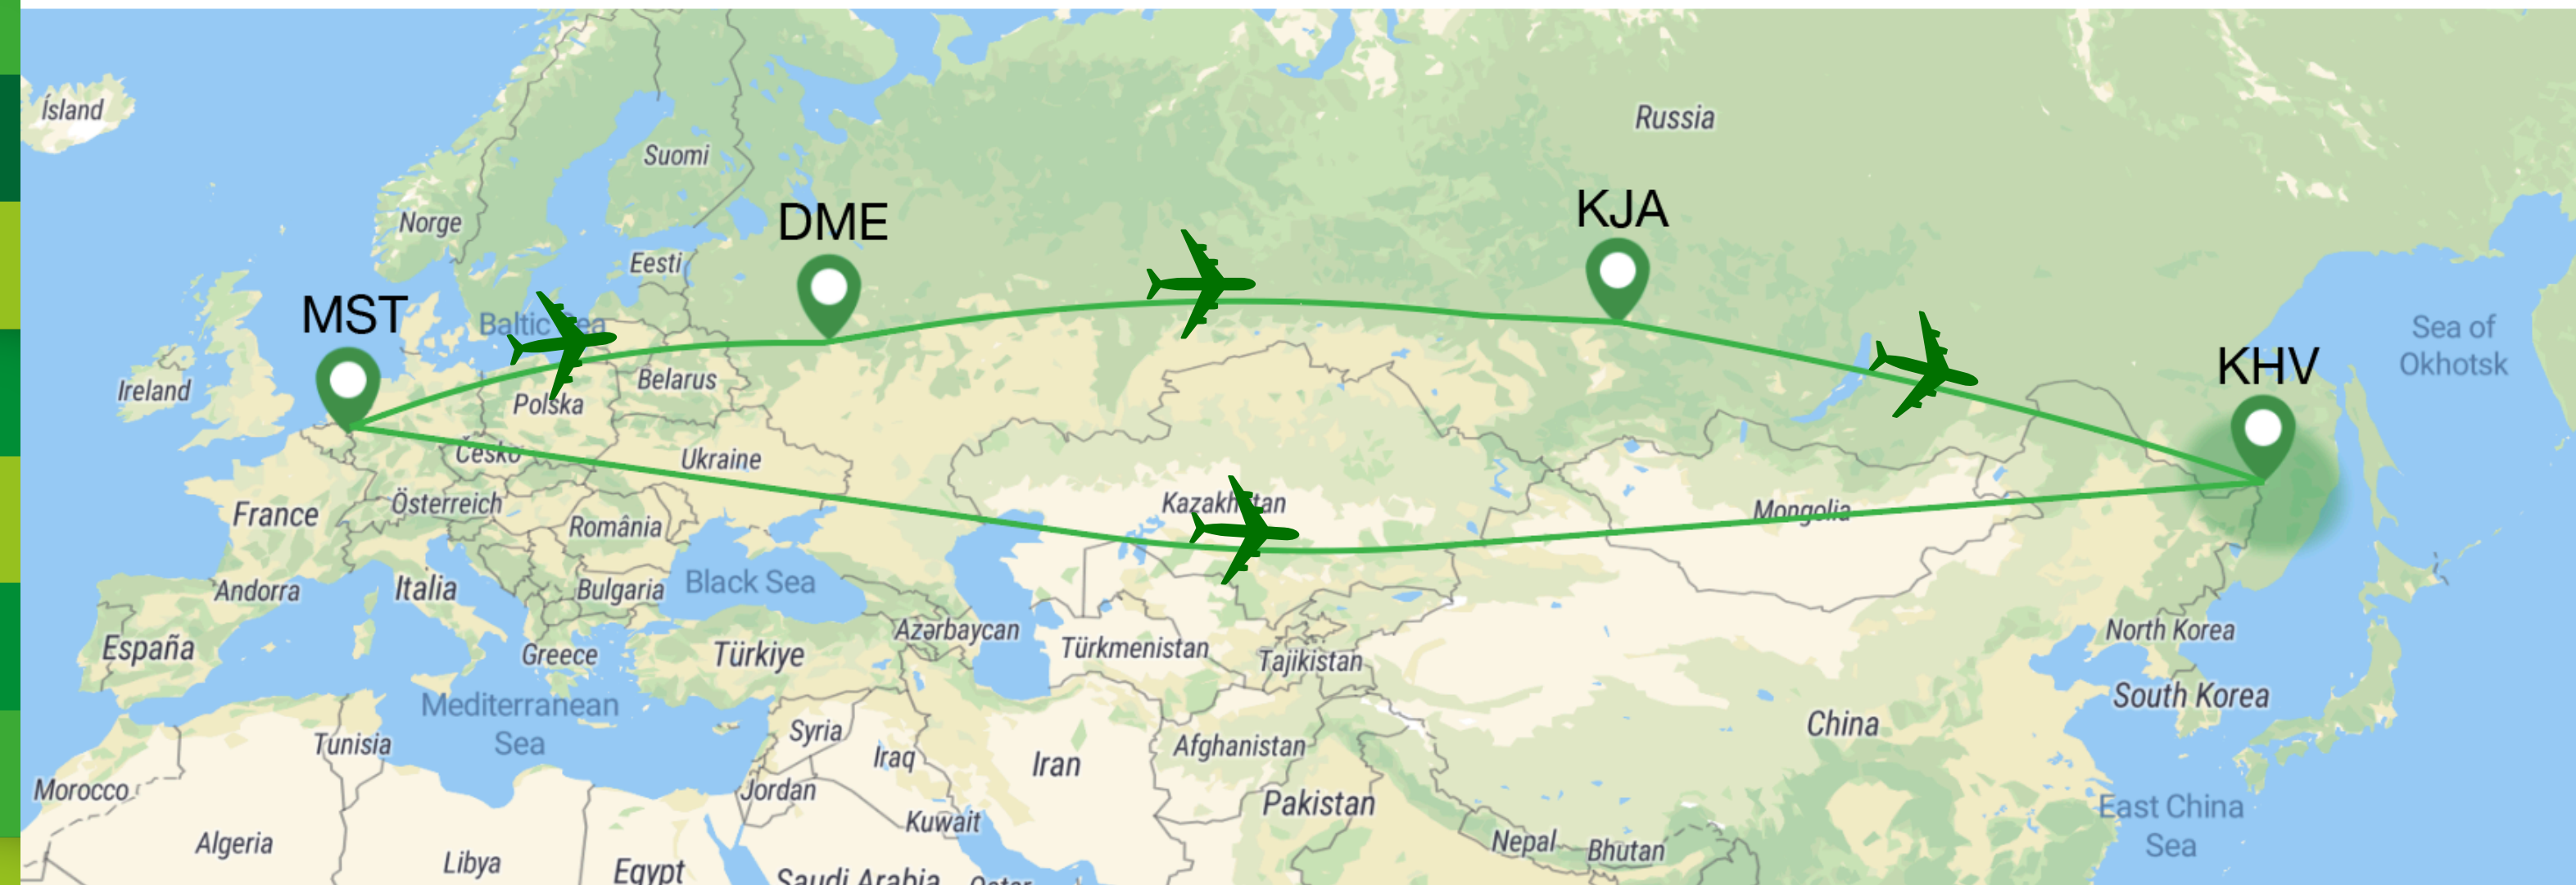

MAIN CHALLENGES:

- Customer requested a simultaneous transportation of all modules since the platforms could not operate without a control station which was required to enable loading / unloading operations
- The total cargo weight exceeds capacity of a single Il-76 flight and the price for a larger An-124 aircraft was 40% above the budget.

SOLUTION:

SYNCHRONISED TRANSPORTATION WAS ORGANISED BY TWO FLIGHTS – IL-76 FOR THE OUTSIZE PLATFORMS AND BOEING-747 SCHEDULED LINE FOR THE CONTROL STATION

The customer was provided with additional services including cranes hire, terminal and apron cargo handling arrangements.

Case study: Large scale project

ORGANISING AIR TRANSPORTATION OF OUTSIZE OIL & GAS EQUIPMENT FOR CONSTRUCTION OF GAS COMPRESSOR STATIONS IN KAZAKHSTAN – PREPARATION AND IMPLEMENTATION OF **15 CHARTER FLIGHTS** INVOLVING **4 AIRLINES**

ROUTE:

SAN BERNARDINO AND HOUSTON (USA) – TARAZ (KAZAKHSTAN);
UAE – KAZAKHSTAN

WEIGHT: more than 1000 tons of various heavy-weight and outsize Oil & Gas equipment

MAIN CHALLENGES:

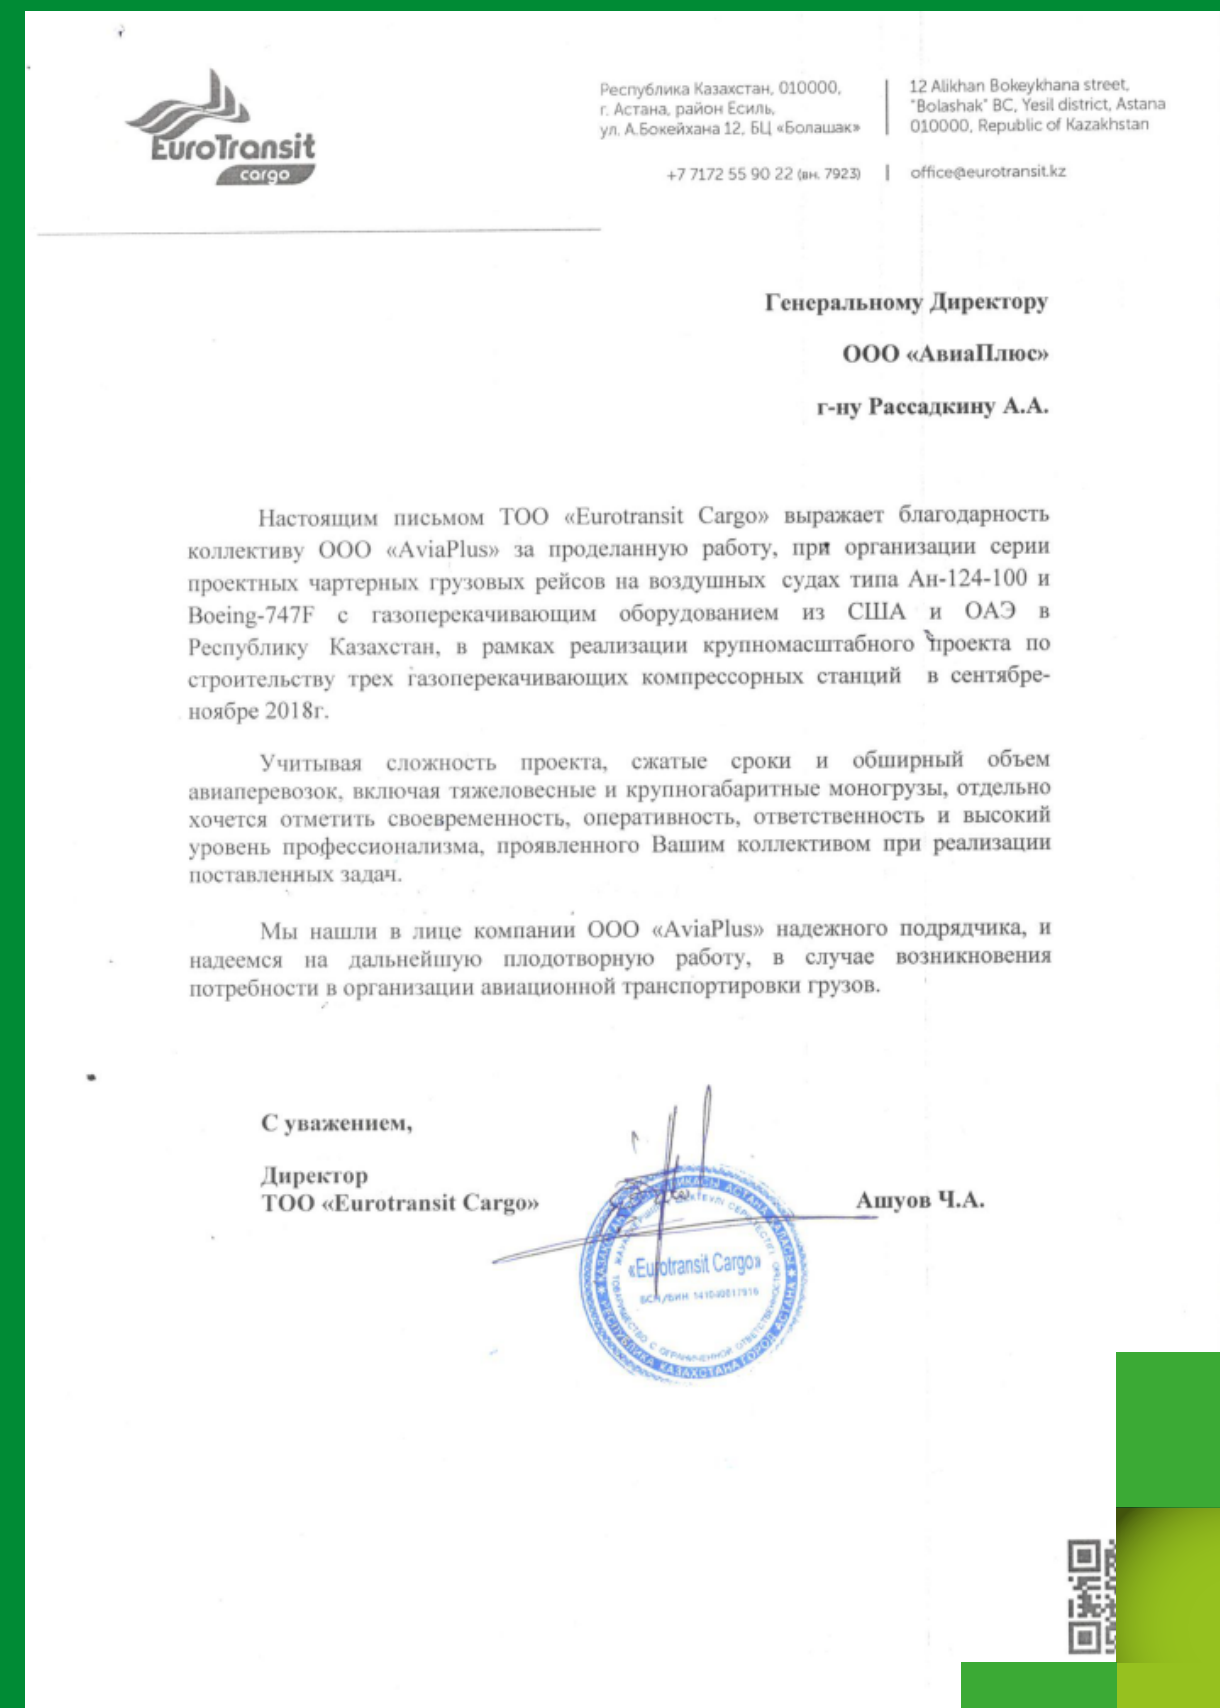

- Short delivery terms for transportation of different equipment that is produced in three main production facilities - San Diego (California), Houston (Texas) and Dubai (UAE).
- Organization of synchronized arrival to Kazakhstan of various consignments of the same set of equipment due to customs clearance formalities.
- Information about the dispatch dates of a particular equipment is available just one week before departure of each flight.

4 airlines

15 flights

Case study: Oil & Gas Project in Kazakhstan

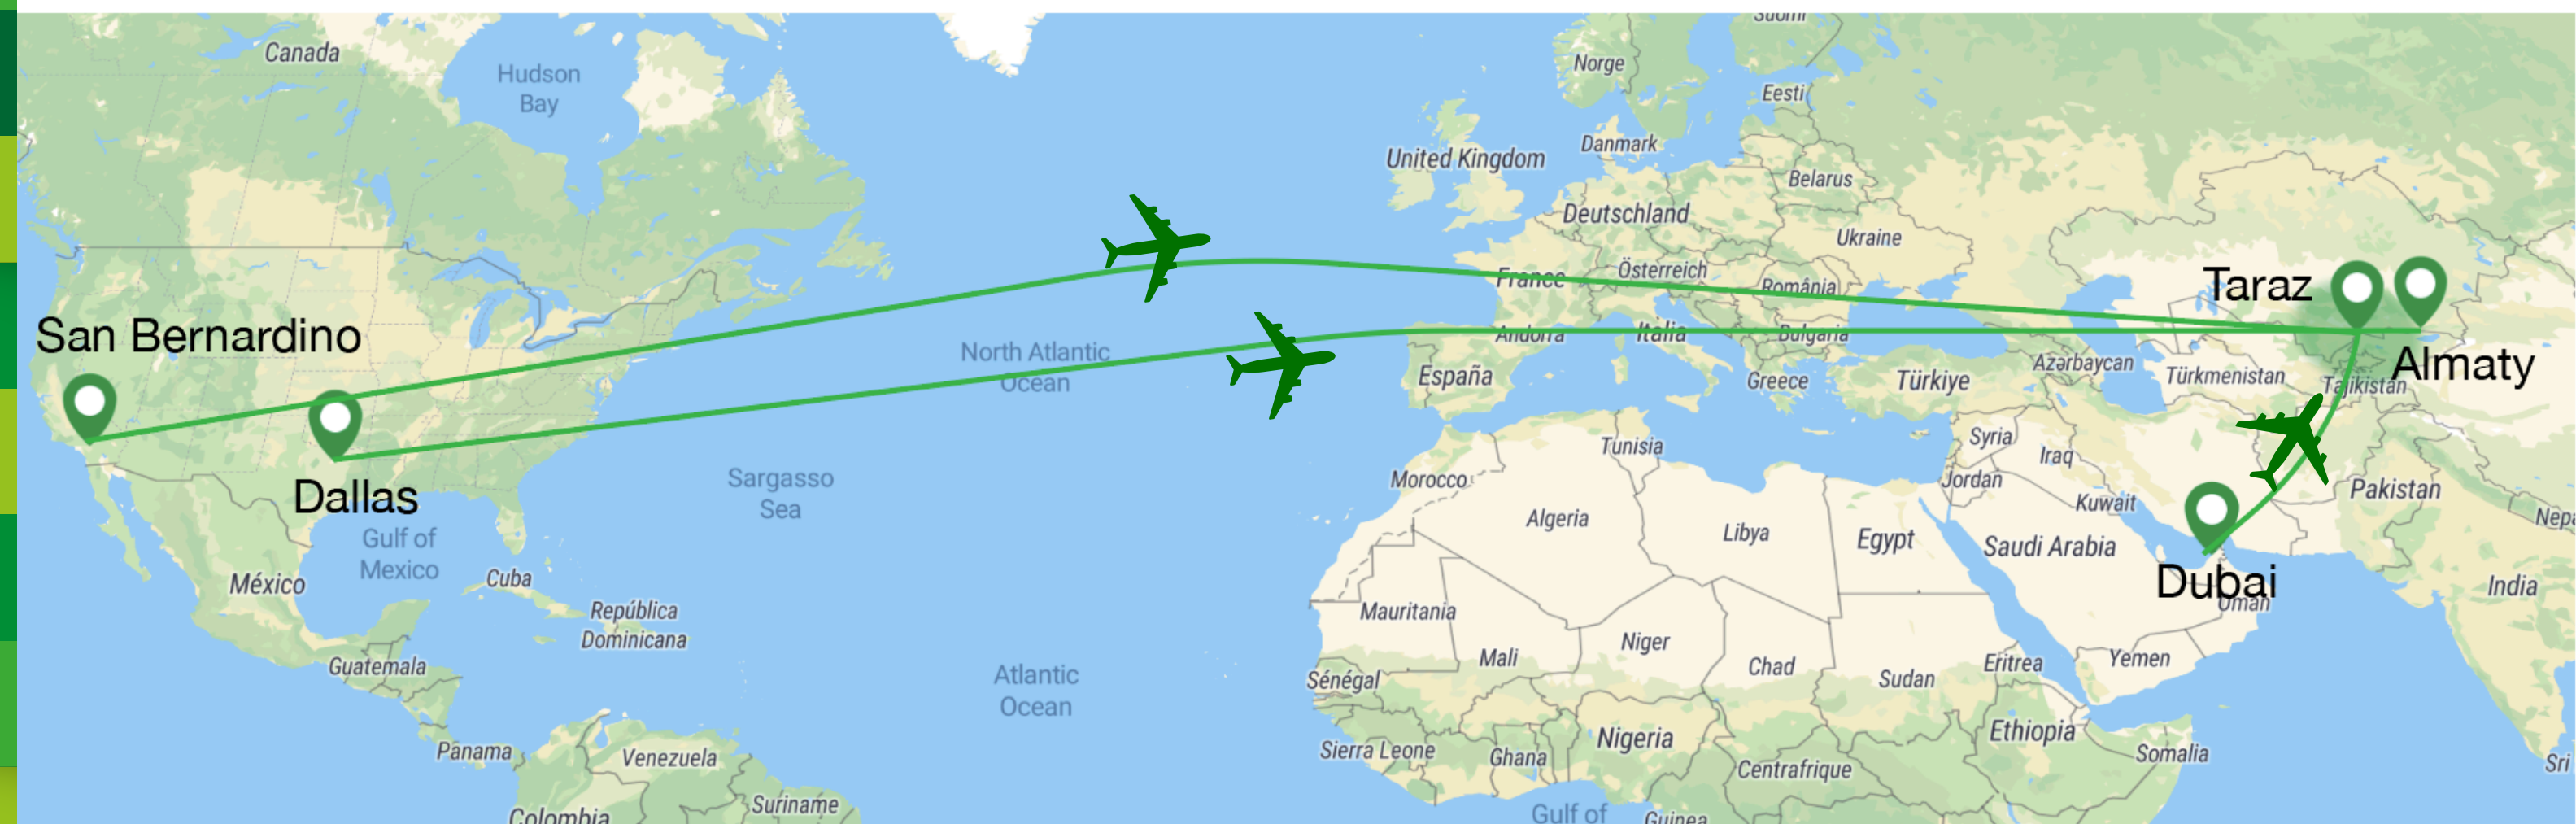

ROUTE: USA - KAZAKHSTAN

10 flights x Antonov-124 with payload up to 100 tons each
3 flights x Boeing-747F with payload up to 90 tons each

ROUTE: UAE - KAZAKHSTAN

2 flights x Antonov-124 with payload up to 50 tons each

... AND HONOURABLE GRATITUDE AND RECOGNITION FROM THE CUSTOMER
